

UPCOMING ROAD MAINTENANCE IN YOUR NEIGHBORHOOD

June, 2018

Dear Resident or Business Operator:

Weather permitting, we will soon be maintaining several streets in Seattle through the Crack Seal Program. SDOT crews will fill cracks in the pavement with a low-tack sealant to reduce the infiltration of surface water, thus slowing the deterioration of the roadway. This work will be helpful in preventing the formation of potholes and other pavement distresses.

The crack-filling work will be done at these locations that include your neighborhood:

- 47 Ave SW – from #10203 to #10226
- Halleck Ave SW – from SW College St to 53 Ave SW
- 53 Ave SW – from Halleck Ave SW to Alki Ave SW
- Marine View Dr SW – from SW Roxbury St to 42 Ave SW
- 2 Av SW – from 1 Av SW to Highland Parkway SW
- 13 Ave S – from S Albro Pl to Airport Wy S
- S Bailey St – from 13 Ave S to Corson Ave S
- Stanley Ave S from S Albro Pl to 13 Ave S
- S Dearborn St – from 5 Ave S to I-5 southbound off-ramp
- S Weller St – from 20 Ave S to 18 Ave S
- 18 Ave S – from S Weller St to S Jackson St
- 2 Ave – from Denny Wy to Stewart St (except bike lanes)
- E Harrison St – from 33 Ave E to Lake Washington Blvd/37 Ave E
- 26 Ave E – from E Galer St to North of Boyer St where it changes to concrete pavement (#1759)
- E Lynn St – from 26 Ave E to 25 Ave E
- NE 115 St – from Lake City Wy NE to 35 Ave NE
- NE 110 St – from 35 Ave NE to Sand Point Wy NE
- N 50 St – from Fremont Ave N to 1 Ave NE
- NE 50 St – from 1 Ave NE to Roosevelt Wy NE
- NE 55 St – from 35 Ave NE to Princeton Av NE
- NE 65 St – from 35 Ave NE to NE Princeton Wy NE
- NE 70 St – from 40 Ave NE to Sand Point Wy NE
- NE 75 St – from 20 Ave NE to 50 Ave NE

SCHEDULE: The crack sealing will start on June 18, likely in the order shown above and will continue through the summer months. Due to weather dependence and other unforeseen factors, the order and road work schedule is subject to change. The installation of “No Parking” signs prior to the start of work will be a good indication of our upcoming work on your street. If you need more information regarding the schedule, please contact us.

PARKING: Parking will be temporarily restricted on both sides of the street as the work will address all cracks from curb to curb, or from edge to edge. “No Parking” signs will be installed approximately 72 hours prior to start of work. The parking restrictions will be in effect from 7 AM to 5 PM, and are removed as soon as the maintenance work is done. The crack seal process is typically done within a day.

LANE CLOSURES: There will be **no** full street closure during the operation. However, we will close lanes intermittently, and parking will be restricted. Lane closures may last approximately 3-4 hours. Access to driveways or alleys may be disrupted for a few minutes during the road maintenance, but SDOT crews will work to minimize any delays and will provide assistance as needed. Traffic flaggers will be present during maintenance work. Sidewalks will remain open at all times.
