

CONSTRUCTION BEGINS SOON

October 12, 2022

PROJECT DESCRIPTION: INSTALL ACCESS HATCH FOR UNDERGROUND 430 PIPELINE

Seattle Public Utilities (SPU) will soon begin construction to repair portions of the large 430 Pipeline that runs four miles from Volunteer Park to Maple Leaf Reservoir in Seattle. The pipeline was built in the early 1900s and is part of the region's drinking water system.

Construction associated with the 430 Pipeline Improvement project includes a installing a utility hatch to allow crews to access the underground pipeline in your neighborhood.

LOCATION:

The 430 Pipeline project is a multisite project. Construction at this site will take place **along 7th Ave NE near 664 NE Northlake Way** and will occur in the street.

SCHEDULE:

Work at this site is scheduled to begin around October 28 and is expected to last for **several weeks**. Crews will work weekdays from 7 am to 5 pm. Noisy work will occur after 8 am. Upon completion of the work, the street and other areas disturbed during the construction will be restored. Crews will return to this site to permanently repave the street, and periodically access the 430 Pipeline for cleaning and repairs.

WHAT TO EXPECT DURING CONSTRUCTION:

- Pavement excavation, construction noise, dust, dirt, and vibrations.
- Temporary road closures and detours near **7th Ave NE at NE Northlake Way**
 - Crews will work to provide local access during working hours, but there may be intermittent, brief road closures to accommodate construction activities. Please allow for extra time when traveling to and from businesses.
 - Employees and visitors will continue to have pedestrian access to the businesses throughout construction. During working hours, crews will escort people, as needed.
 - Crews will reopen the road for local access on nights and weekends.
 - Please follow all on-site signage and crew instructions.
- On-street parking near the work area will be prohibited and driveways may be blocked.
 - If you are in the work area and anticipate needing your car, please relocate your car outside of the work area and avoid parking in areas with no-park signs.
- Slowed vehicle traffic and staging of equipment and construction vehicles near the project area.
