

Pedestrian Improvements

We're partnering with the Seattle Department of Transportation (SDOT) to incorporate sidewalks into the streets that do not currently have formalized sidewalks, which aligns with community requests to install sidewalks as a part of this project.

Anticipated Impacts to Residents

We will be coordinating with the nearby community throughout design and construction to make sure everyone knows the changes that will be made to the streets selected for NDS. We will coordinate on the below impacts with each impacted resident. At this time, we anticipate:

- **NDS improvements may require some driveways to be restored to the City's 10 foot width standard in the public right-of-way**
- **Gas lines, side sewers, and water utilities will need to be adjusted during construction**
- **Mailboxes, fences, vegetation, and other structures may need to be relocated due to sidewalk, road, and NDS improvements**

PROJECT AREA MAP

Project Timeline

The South Thornton NDS Project is currently in the design phase. We just reached the 60% design milestone and expect to begin construction on this multi-site project in late 2022/early 2023.
